Abdul Rahman Sidiq

Quality Control at PT. Pulau Sambu | IT Consultant | Freelance Full Stack Developer & Graphic Designer
Indragiri Hilir Regency, Riau, Indonesia

Summary

I am a full stack developer, especially in the field of web development. I am still studying at Asia Cyber University, majoring in Informatics Engineering. On the other hand, I also work as a quality control officer at a company within the Sambu Group and freelance on side projects for freelancing websites.

Experience

PT.PULAU SAMBU GROUP

Quality Control

February 2023 - Present (3 years 5 months)

Indragiri Hilir Regency, Riau, Indonesia

Responsible for ensuring that the entire desiccated coconut production process, raw materials, and final products meet food safety standards and applicable regulations, including GMP, SSOP, HACCP, ISO 22000, and FSSC 22000. Experienced in physical, chemical, and organoleptic laboratory testing, and actively involved in monitoring critical control points in the production area.

- Conduct daily pre-operational inspections on the production line to ensure optimal implementation of GMP and SSOP.
- Monitor and verify Critical Control Points (CCPs) in the production process to prevent potential physical, chemical, and biological hazards.
- Conduct regular product quality testing (organoleptic testing, pH, moisture content, brix, and viscosity) to ensure consistent taste and product quality.
- Identify non-conforming products, hold them, and coordinate with the production team for prompt corrective action.
- Accurately complete and manage daily quality record documentation to support product traceability.
- Successfully maintain a product pass rate above 90% and contribute to minimizing product rework during the production period.

ARAHMANS

7 years

Freelance Full Stack Developer

July 2021 - Present (5 years)

Indragiri Hilir, Riau, Indonesia

Worked as a freelance Full Stack Developer on Fiverr and Contra, delivering tailored web solutions for both local and international clients. Specialized in building responsive, scalable, and user-friendly web applications, covering both front-end and back-end development.

Core Skills:

- Front-End: HTML, CSS, JavaScript, Bootstrap, TailwindCSS, React.js, Vite, Next.js
- Back-End: PHP, Laravel, CodeIgniter, Node.js, Express.js
- Databases: MySQL, MongoDB
- Additional Expertise: API integration, payment gateway implementation, performance optimization, web application deployment

Responsibilities & Achievements:

- Designed and developed custom websites and web applications based on client requirements.
- Built responsive UIs to ensure seamless cross-device compatibility.
- Developed RESTful APIs and integrated third-party services.
- Managed both relational (MySQL) and non-relational (MongoDB) databases for various applications.
- Successfully completed multiple international and national projects.
- Delivered diverse projects, including e-commerce platforms, company profiles, business dashboards, and custom web applications.

Freelance Graphic Designer - Logo & Brand Identity

July 2019 - June 2026 (7 years)

Indragiri Hilir Regency, Riau, Indonesia

Experienced Graphic Designer specializing in creating impactful logos and brand identities for businesses and organizations. Skilled at developing visual concepts that strengthen brand recognition and communicate a company's values effectively.

Key Responsibilities:

- Designed unique and professional logos aligned with each client's brand vision.

- Developed comprehensive brand identity systems including color palettes, typography, icons, and design guidelines.
- Collaborated with clients to understand their brand strategy, target audience, and positioning.
- Produced design mockups and branding materials for both digital and print applications.

Key Achievements:

- Helped local and international clients establish a strong and consistent brand presence.
- Delivered brand identities that improved clients' market visibility and customer engagement.
- Achieved high client satisfaction through tailored and impactful design solutions.

Self Employed

Freelance Cloud & Software Engineer

October 2025 - January 2026 (4 months)

Indragiri Hilir, Riau, Indonesia

- Helping individuals and companies across Asia to build, develop, and manage web & cloud-based applications.
- Handling end-to-end deployment for various stacks (Node.js, PHP, Golang, Java, Python, Express.js, Nest.js, React.js, Next.js, Laravel, FastAPI, Django, Flask).
- Implementing cloud architecture on AWS & Google Cloud for various services (IaaS, PaaS/Serverless) - VPC, IAM, ECR, ECS, RDS, S3, GAR, GCR, GCS, Cloud SQL, Multi AZ, ALB (Load Balancing Layer 7)
- Providing DevOps services including containerization, CI/CD pipeline, and automation.
- Assisting with technical documentation, debugging, performance tuning, and infrastructure consulting.
